IDENTIFICATION

Records identified from literature and data repositories (n = 18,131)
Crossref: 6,030 Google Scholar: 4,232 Europe PMC: 2,209
Scopus: 2,032 Web of Science: 1,979 PubMed: 853
ProteomeXchange / ProteomeCentral / PRIDE: 359 MassIVE: 160
iProX: 91 jPOST: 2 Panorama Public: 6
NODE/OEP: 1 OMIX/NGDC: 17 GEO: 160

Records after deduplication
and identity reconciliation
(n = 7,139)

SCREENING

Title/abstract and
metadata screening
(n = 7,139)

**Excluded during initial screening
(n = 5,840)**

Not related to K1a — 2,972
Reviews or other non-original
publications — 1,846
No site-level K1a data indicated — 1,022

EVIDENCE ASSESSMENT

Detailed evidence
assessment
(n = 1,299)

**Excluded after detailed assessment
(n = 1,184)**

Targeted or non-discovery studies: 527
No extractable site-level K1a data: 400
No qualifying primary evidence after
reassessment: 246
Processed site-level table
unavailable: 11

INCLUSION

**Retained after detailed assessment
(n = 115 publications, 182 integrated source tables)**
